

ROTA X.40

HANDLING TOOL GUIDE

Always use the handling tool to remove metal containers from the biaxial mixer ROTA 400 and ROTA X.40. If you do not have a handling tool, please contact your service contact for mixers and shakers.

Never remove metal containers by hand!

Remove metal containers ergonomically **only** with the handling tool

Watch the video to learn more about using the handling tool

Remove plastic containers simply by hand – no handling tool required
